CONTENTS

PREFACE 9

I. THE PHOTOGRAPHIC DEVELOPER: GENERAL CONSIDERATIONS

What is Photographic Development? 13
Physical Development 14
Chemical Development 14
General Constitution of Developers 14
The Developing Agents 15
(a) Type $HO-(C=C)_n-OH$ 16
(b) Type $HO-(C=C)_n-NH_2$ 19
(c) Type $NH_2(C=C)_n-NH_2$ 23
(d) Type $HO-(C=N)_n-NH_2$ 26
(e) Type $NH_2-(C=N)_n-NH_2$ 27
Exceptions to the Rule 27
Superadditivity 29
The Alkali or Accelerator 29
The Preservative 34
The Restrainer 37
Organic Antifoggants 39
Development Accelerators 41
(a) Cationic Wetting Agents 41
(b) Cationic Dyes 42
(c) Neutral Salts 42
(d) Polymeric Non-ionic Compounds 42
(e) Organic Amines 43
(f) Thio compounds 44
(g) Other Compounds 44
Wetting Agents 44

II. THE PHOTOGRAPHIC DEVELOPER: PURITY OF CHEMICALS AND WATER

Grades of Purity 47
British Standard Specifications 47
Quality of the Water 51
Sequestering Agents 55
Class 1. Complex Phosphates 56
Class 2. Nitrogenous Carboxylic Acids 57
Class 3. Hydroxyacids 61

III. THE PHOTOGRAPHIC DEVELOPER: THE CHEMISTRY OF THE DEVELOPING AGENTS

Oxidation of Developing Agents 63
Hydroquinone 64
Metol 75
Phenidone 79

IV. THE PHOTOGRAPHIC DEVELOPER: MECHANISM OF DEVELOPMENT

The Thermodynamics of Development 89
The Mechanism of Development 90
The Development Centre 90
Theories of Development 91
Charge Barrier Effects 98
Adsorption to the Silver Halide Grain 101
Adsorption of Organic Antifoggants 104
Superadditivity 105
The Silver Image 109
The Structure of the Developer Silver Image 109
The Colour of the Developed Silver 110
Photometric Equivalent and Yield of Silver 111
Kinetics of Development 112
Mixed Chemical and Physical Development 112
Diffusion Phenomena 114
Activation Energies and Development Kinetics 115
Practical Effects of Developer Variables 117
Effect of Bromide Ion Concentration 117
Effect of Developing Agent Concentration 118
Effect of Alkali and pH 120
Effect of Sulphite 121
Effect of Overall Dilution 122
Effect of Temperature 123
Effect of Agitation 123
Fog 124
Latensification 126

V. THE PHOTOGRAPHIC DEVELOPER: PRACTICAL CONSIDERATIONS AND FORMUL

Image Characteristics 133
Phenidone versus Metol 135
Replenishment and Replenishers 138
Compounded Chemicals 141
Liquid Concentrates 141
Powder Mixes 142
Conventional Developers 144
Universal Developers 144
General Purpose Negative Developers 144
Fine Grain Developers 145
High Acutance Developers 149
'One-shot' Developers 150
High Contrast Negative Developers 150

X-ray Developers 151
Gelatin-hardening Agents in Developers 153
Paper Developers (Continuous Tone) 155
Developers for Document and Photomechanical Papers 156
Developers for Recording Materials 157
Developers for Special Techniques and Processes 157
Developers for Silver Diffusion Processes 157
Activators for Materials with Incorporated Developing Agents 158
Monobaths 158
Developers for Reversal Processing 162
Post-fixation Physical Development 164
Infectious Development of Graphic Arts Films 165
Tanning Development 170
Processsing of Nuclear Emulsions 172
Developers for Ultra-rapid and Total-loss Processing Systems 174
Development by Metallic Ions 177

VI. FIXATION AND STABILIZATION

Fixation 183
Fixing Agents 183
The Chemistry of Fixation 184
Constitution of Fixing Baths 185
The Kinetics of Fixation 187
Hardening Agents in Fixing Baths 189
Practical Considerations 190
Silver Recovery 192
Stabilization 195

VII. WASHING, DRYING AND OTHER PROCESSING STAGES

Intermediate Stages in Processing 201
Washes between Stages 201
Stop Baths 201
Final Washing 201
Image Stability 201
Washing Methods 203
Hypo Eliminators and Washing Aids 206
Reticulation 207
Drying 207
Films and Plates 207
Density Changes 208
Papers 209
Hardening Baths 211
Silver Bleaches 211
Simple Bleaches 211
Rehalogenizing Bleaches 212
Bleach-fixing Solutions 214
Reduction 217
Intensification 219
Toning 221

VIII. COLOUR PROCESSING: THE COLOUR DEVELOPMENT REACTION

Modern Colour Processes 225
Colour Development 227
The Colour Developing Agents 229
Structural Considerations 229
The Oxidation of Colour Developing Agents 235
The Colour Couplers 238
Couplers Forming Yellow Dyes 239
Couplers giving Magenta Dyes 240
Couplers giving Cyan Dyes 242
Location of Colour Couplers 243
The Coupling Reaction 244
Sensitometric Considerations 251
Black and White Developing Agents in Colour Developing Solutions 252

IX. COLOUR PROCESSING: PROCESSES BASED ON THE NORMAL COLOUR DEVELOPEMENT REACTION

Reversal Processes 257
First Development 258
Processes having Couplers in the Developing Solutions 260
Processes for Incorporated Coupler Emulsions 265
Negative Materials 266
Colour masking 267
DIR Couples 268
Processing 271
Print Materials 272
Processing Control in Commercial Processing 273

X. COLOUR PROCESSING: PROCESSES NOT BASED ON THE NORMAL COLOUR DEVELOPMENT REACTION

Processes Based on a Modified Colour Development Reaction 275
Indazolone Couplers 275
Benzisoxazolone Couplers 276
Hydrazine Developing Agents 276
Hydrazone Developing Agents 276
Azine Dye Formation 277
Processes Based on Dye Destruction 281
The Silver Dye Bleach Processes 281

APPENDIX I 287

APPENDIX II 291

SUBJECT INDEX 295

PATENT INDEX 317
